

NAFTES

Naval Fire Fighting Training
& Education System

Erasmus+

ABOUT NAFTES

NAFTES is an Erasmus+ project aiming at enhancing the quality of the training of military and commercial ship crews in firefighting operations.

The training will be supported by the NAFTES virtual learning environment, which includes the use of rich media, innovative preparation tools and augmented reality (AR) technology.

VOCATIONAL EDUCATION & TRAINING

The NAFTES project will develop the following didactic products:

- A rich-media toolbox consisting of interactive educational material
- A multi-lingual e-learning portal for personalised distance learning
- An AR application for hands-on training

TRAINING EVENTS & WORKSHOPS

The project will organize 3 Training Events and 3 Dissemination Workshops, in which end-users and stakeholders will have the chance to interact with and validate the capabilities of NAFTES.

The envisioned training events aim to train professionals in Greece, Cyprus and Italy. NAFTES envisions specific training sessions in each country adapted to the host country and professionals characteristics. Workshops aim to disseminate the final products of NAFTES to a wider audience compared to the training events (i.e. key actors and stakeholders).
